DRUG-PAK[®]

Blister foil lidding with excellent
push-through characteristics

DRUG-PAK[®] - Blister foil lidding with excellent push-through characteristics

Standard hard and soft temper 20 micron and 25 micron push-through Drug-Pak[®] blister lidding foils are suitable for platen or rotary blister machines.

Benefits

- Available both pre-printed or to print in-line
- Acceptable for use in non-child resistant applications
- Proprietary coating can allow for lower sealing temperatures and shorter dwell times
- Coating weight provides improved seal consistency
